

fair

forum for anti-doping in recreational sport

Doping in recreational sport has become a societal problem and a public health concern.

The FAIR project will:

- Review existing doping prevention interventions, including for food and food supplements which are aimed at sports people
- Report on their good practices which are proven to be effective
- Provide a forum for open discussion and objective thinking about reducing the prevalence of doping for performance- and image-enhancing purposes
- Inform key stakeholders and policy makers on evidence-based planning and encourage them to adopt the good practices and to use the information material/tools to raise awareness of doping issues to their users
- Independent research undertaken through a Doctoral Studies Programme

The FAIR project is based on the insights provided by the Study on Doping Prevention in Recreational Sport published by the European Commission.

Project Partners

Prof. Michael Mcnamee (Swansea University)

Prof. Susan Backhouse (Leeds Beckett University)

Bart Coumans (Anti-Doping Authority Netherlands)

Anne Thidemann (Virke)

Prof. Ask Vest Christiansen (Aarhus University)

Dr. Michael Petrou (Cyprus Anti-Doping Authority)

Prof. Fabio Lucidi (Universita di Roma La Sapienza)

Gaetan Garcia (TAFISA)

and

EuropeActive EU projects team

The FAIR project started on 1st January 2017 and has a planned completion by 31st December 2019.
